

PRELIM EXAM

GE 4120 : 21ST CENTURY IT SKILLS

OVERVIEW

This Prelim Examination focuses on assessing students' professional communication, documentation, presentation, and digital portfolio skills through a recorded presentation summarizing their progress from Weeks 1 to 5.

This activity mirrors real industry practice, where designers, developers, and digital creators are often required to present their work, explain their creative and technical decisions, and showcase their portfolios when applying for internships, presenting prototypes, or communicating project progress.

TOPICS TO DISCUSS:

1. GITHUB SETUP AND PORTFOLIO ORGANIZATION

Introduce your GitHub repository and explain how you set it up and organized your work.

Discuss the following:

- **How you created and set up your GitHub repository.**
- **How you uploaded and organized your activities and outputs.**
- **The process you followed to make your digital portfolio accessible and presentable.**
- **Any challenges you encountered and how you addressed them.**

TOPICS TO DISCUSS:

2. DISCUSSION OF THE THREE ACTIVITIES

Present and elaborate on each of the three activities completed during the Prelim period. For each activity, explain what you created, why you came up with the concept, and how you developed your final output.

Activity 1: Presentation Design Principles

Discuss the design principles you applied and how they improved your presentation.

Activity 2: Color Palette and Typography

Explain your chosen colors and typography and why you selected them.

Activity 3: Social Media Infographics and Mini Project Documentation

Present your output and explain its concept, design choices, and creative process.

TOPICS TO DISCUSS:

3. PRESENTATION WRAP-UP

Conclude your recorded presentation by answering the following question:

“What is the importance of Presentation Design?”

Reflect on how effective presentation design can help communicate ideas, improve understanding, engage an audience, and create a meaningful and professional visual experience.

additional guidelines:

- The recorded presentation must have a duration of **5 to 8 minutes only**.
- The submitted video file must be in **MP4 format**.
- Students must be visible on camera during the presentation. The video should include both the student's face and the presentation materials being discussed.
- Ensure that the audio is clear and that the presentation materials are visible and readable throughout the recording.
- File name should be "**PRELIM EXAM_SURNAME.mp4**"

criteria:
